Project Overview

Introduction

horas, is online time management application created for busy professionals. This application allows the user to keep track of tasks, clients and projects. The user can add clients, projects, and tasks to their time management to help keep them on track. horas also allows the user to prioritize their tasks and set them as high-priority or completed. As project requirements change, users have the ability to edit each project as needed.

Features

Project Page:

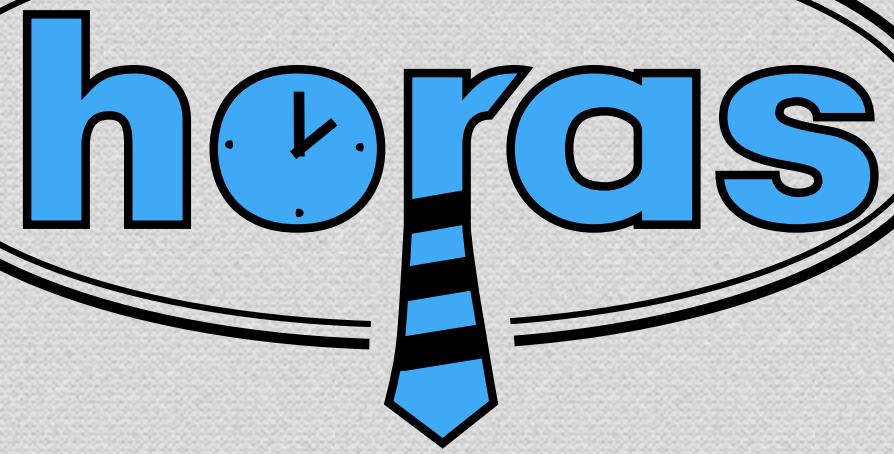

The project page will display a list of all current and past projects. Also, the user will be able to create new projects, as well as edit current projects listed.

Task Page:

Once the user chooses a project by clicking on it, they will be taken to the task page. The task page will display all tasks that are related to the current project. From here, the user can add new tasks to a project, or edit any of the current tasks.

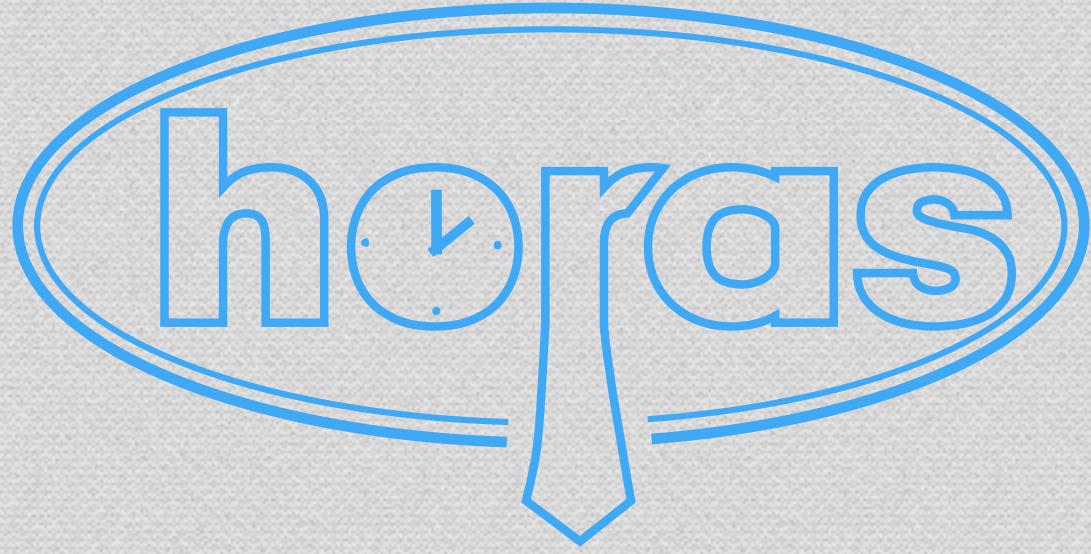

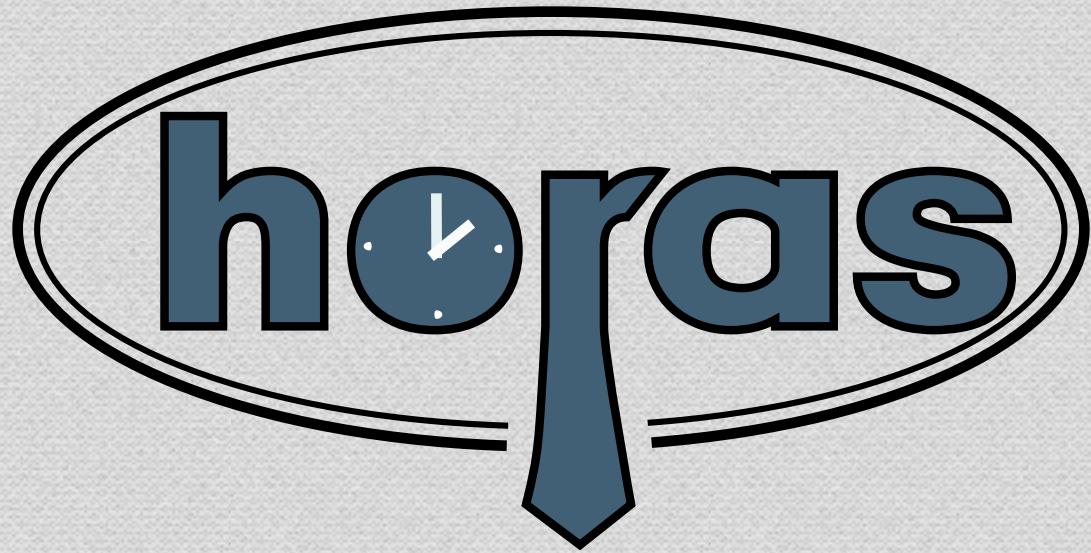

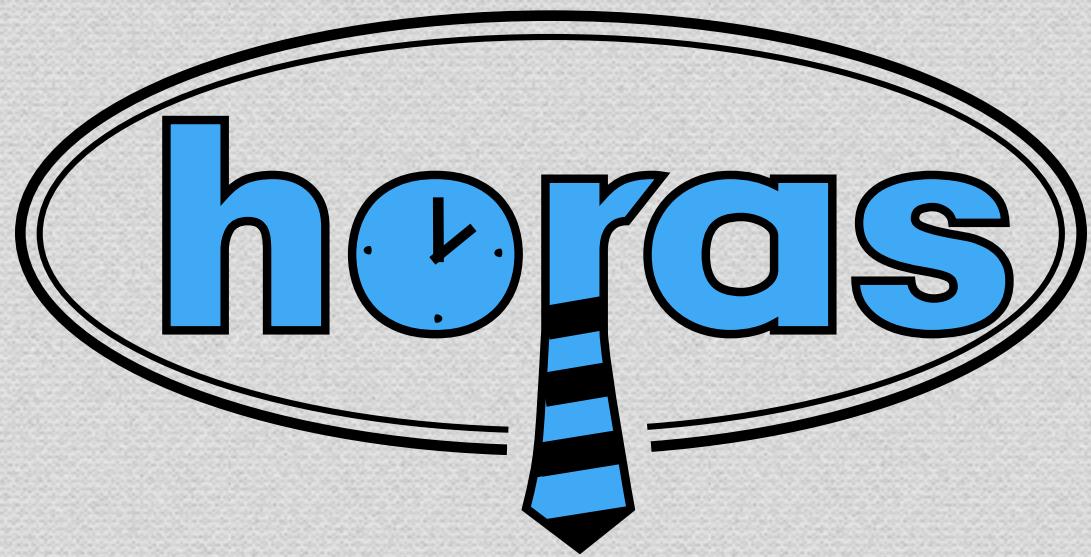

Target Audience

horas aims to provide a free time management solution to any business professional that has a busy schedule. The age range of the typical user will be between 20 – 45 years of age. They will commonly work either in an office environment, or as a freelance professional. Users of horas will be frequent computer users.
